

System Specifications

UNIVERGE® SV8300 Communications Server

The UNIVERGE® SV8300 Communications Server is a robust, feature-rich solution that is completely scalable and can be expanded to meet a medium-sized business' communications needs, now and in the future.

At a glance

- 19" stackable chassis architecture
- Support of up to 1536 stations and 512 trunks
- Open standards and Open Application Interface, including SIP and XML
- Enables Unified Communications integration

Fulfilling the promise of UNIVERGE®360

The speed of business today demands efficient, seamless communications to enable rapid decision-making and customer responsiveness. To succeed at this accelerated level, medium-sized businesses must have the right communication tools. NEC provides those businesses with the communications and networking solutions that enable them to succeed.

Benefits of the SV8300 include:

- **Rack-stackable architecture**- The SV8300's stackable chassis supports server functions, media gateways and media converters in a single unit
- **Support for both VoIP and traditional voice**- Deployment of a pure IP solution or any combination of IP and traditional circuit-switched technology is supported on a single SV8300 system
- **Application integration**- Applications are easily accessed through simple license activation
- **Scalability**- As your business grows, so do its communication needs. The SV8300 seamlessly scales to 2048 ports in a single system network image

Specifications
